App Name: SmartAttendance - Smart Campus Attendance System

Last Updated: May 30, 2026

Version: 1.0

Developed by: Areeba Amjad & Saba Sikander

University: University of Layyah

Department: Department of Computer Science

Course: Mobile Application Development CS-610 | Section: BSCS 6th M Sec B

Supervisor: Mam Nabiha Komal

1. Introduction

SmartAttendance is an Android mobile application developed as an academic project by students of the University of Layyah. This Privacy Policy describes how we collect, use, store, and protect your personal information when you use our application. We are committed to maintaining the privacy and security of your data in compliance with best practices.

Important: This application is developed solely for educational purposes as part of CS-610 course requirements. No data is shared with commercial entities.

2. Information We Collect

We collect the minimum information required to provide attendance services:

- **Personal Account Information:** Full name, university email address, roll number, department, and password for user authentication and account identification.
- **Academic Data:** Subject names, class schedules, attendance records including date, time, and status (Present/Absent/Late) to generate attendance reports.
- **Biometric Data:** Facial recognition templates captured using Google ML Kit for attendance verification. **All facial data is processed and stored locally on your device only.** No facial images or biometric templates are uploaded to any server or cloud storage.
- **Communication Data:** Text messages sent through the in-app chat feature between students and teachers for academic purposes only.
- **Device Information:** Device model and Android version for app compatibility and debugging purposes only.

3. How We Use Your Information

Your information is used exclusively for the following purposes:

- To authenticate users and provide access to role-based dashboards
- To record and track student attendance for classes and subjects
- To generate monthly attendance reports and percentage analytics
- To prevent proxy attendance through QR code and face verification
- To enable secure communication between students and teachers
- To improve app functionality, fix bugs, and ensure security
- To comply with university attendance policies and academic requirements

4. Data Storage & Security

We implement strong security measures to protect your data:

- **Encryption:** All passwords are hashed using SHA256 encryption. No plain text passwords are stored.
- **Local Biometric Storage:** Facial recognition data is encrypted and stored only on the user's device using Android's secure storage. It never leaves the device.

- **Database Security:** Attendance data is stored on Firebase Realtime Database with strict access rules. Teachers can only access their own class data.
- **Access Control:** Role-based access ensures students cannot view other students' data, and teachers cannot access admin functions.
- **No Third-Party Sharing:** We do not sell, trade, rent, or share your personal information with any third party for commercial purposes.

5. Your Rights & Choices

As a user of SmartAttendance, you have the following rights:

- **Access:** You can view all your personal data and attendance records within the app
- **Correction:** You can update your profile information through the app settings
- **Deletion:** You can request permanent deletion of your account and all associated data by contacting university admin
- **Opt-Out:** You can choose QR code attendance instead of face recognition if you prefer
- **Consent Withdrawal:** You can stop using the app at any time

6. Children's Privacy

This application is intended for university students aged 18 years and above. We do not knowingly collect personal information from individuals under 18 years of age. If we become aware of such data, it will be deleted immediately.

7. Data Retention

Attendance records are retained for the duration of the academic semester plus 6 months for record-keeping purposes. After this period, data may be anonymized or deleted. User account data is deleted within 30 days of account deletion request.

8. Changes to This Privacy Policy

We may update this Privacy Policy from time to time to reflect changes in our app or legal requirements. The "Last Updated" date at the top will indicate when changes were made. Continued use of the app after changes constitutes acceptance of the updated policy.

9. Contact Us

If you have any questions, concerns, or requests regarding this Privacy Policy or your personal data, please contact us:
